

Refinement of EE2E14

*Overhead writing is small; writing is illegible

Changes: A larger font will be used for lectures. I will do my best to improve my hand writing in tutorials.

*Talk Too Fast

Changes: I will try to slow down and summarize content from time to time

*Poor voice; Can't hear him

Changes: I will use a microphone but please do not sit at the very end of the classroom!

*Assumed knowledge of 2IJ4; we are just taking it now

Response: The gaps in your knowledge is a problem of the system. I am trying my best to make things as clear as possible regardless of your background.

*Quizzes are too hard and hot to handle

Response: The main source for the quiz problems are my lectures, tutorials and homework problems. Questions are not tricky but they require understanding.

*Lab TAs not explaining well; they should go over the procedure of the lab before the lab starts

Changes: I will discuss this issue with the TAs and advise them to give some directions at the start of the experiments

*Not specific enough about what is on the quiz

Response: how specific do you want me to be!

*Too much material, too fast

Response: the content of the course is decided by the Department. What you are covering now is a reduced set of the material they were covering 2 years ago!

*PSpice?

Changes: PSpice problems will not appear in quizzes/exams. PSpice project is now optional and worth 10% of your mark (equivalent to 2 quizzes). Extra 2-lectures on PSpice will be given.

*Have TA recap the lecture/longer the quiz

Response: TAs have maximum working hours that we can not exceed. Most quiz questions take only 2-3 lines to solve (6 minutes each). Not realistic due to time constraint.

*Can you make all the answers to questions available at once?

Response: These answers are prepared by one of the TAs. He prepares the answer for each chapter as we go through it.

*Can you post a formula sheet?

Response: A sheet with all the formulae to be used will be posted soon on the course webpage

*Only 50% of the class are attending lectures and tutorials. This is likely to lead to a high failure rate

Change: All questions in lectures will not be posted. They will be solved in lectures. Not all tutorial questions will be posted.
